EDUCATION

University of Illinois Urbana-Champaign, MCS (Online), GPA 3.67/4.0 — 2025 – 2026

Chung-Ang University, B.E. in Digital Imaging Engineering, GPA 3.99/4.5, Cum Laude — 2017 – 2020

Full-tuition scholarship (3 semesters); undergraduate research scholarship — 2017 – 2018

Chungbuk National University, Civil Engineering, transferred to Chung-Ang — 2011 – 2017

EXPERIENCE

SNOW Corp. — Aug. 2023 – Present

Machine Learning Engineer

- Built the object removal feature, a diffusion inpainting pipeline serving millions of requests per month. Redesigned its training loss, cutting unwanted changes outside the mask by 40%, and tuned its sampling schedule to reduce tone errors.
- Trained LoRAs on FLUX.2 for generative makeup effects, and built a tool that lets designers train new effects.
- Launched the outpainting service on FLUX.2 with a LoRA, with color-corrected seamless compositing and a safety-filter fallback to the base model.
- Fine-tuned background removal adapters on production failure cases and added per-image adapter routing; the feature's save rate and subscription conversion doubled after launch.
- Developed the NSFW classifier that screens all generated images, including its dataset and evaluation.
- Deployed all of the above as inference services on an on-premises GPU cluster.

NAVER Z Corp. — Apr. 2022 – Aug. 2023

Unity Developer

- Built world-editor features for a 3D social avatar platform and optimized terrain rendering with custom shaders.

SNOW Corp. — Dec. 2019 – Apr. 2022

AR Software Engineer

- Developed real-time face-tracking AR camera effects in Lua and GLSL for mobile, and built plugins for the in-house effect-authoring tool.

Chung-Ang University, Teaching Assistant, Computational Thinking — Mar. – Jun. 2019

RESEARCH AND PROJECTS

AAAI-27 Student Abstract, single author, submitted (non-archival) — Sep. 2026

The Open Image-Editing Consistency Judge Is Mostly a Distance in Disguise

Volumetric Video Challenge, SIGGRAPH Asia 2026 Workshop, 4D Gaussian splatting — Jul. – Sep. 2026

NTIRE 2026 Shadow Removal Challenge, CVPR 2026 Workshop — Jan. – Mar. 2026

POSTECH Institute of Artificial Intelligence, Research Intern, visual SLAM — Oct. – Nov. 2019

Intel AI Drone Competition, Team Lead, Honorable Mention — Aug. 2019

Chung-Ang University Graphics Lab, Undergraduate Research Assistant — Oct. 2018 – Jan. 2019

- Advisor: Prof. Kyoungju Park. Built VR and avatar components for a National Research Foundation project.

SKILLS

- **ML:** PyTorch, Diffusers, diffusion models, LoRA fine-tuning, ComfyUI, image segmentation
- **Engineering:** Python, C++, OpenCV, Docker, Kubernetes, LitServe, BentoML, Triton Inference Server, FastAPI
- **Graphics:** C#, Unity, Lua, GLSL **Languages:** Korean (native), English (IELTS Academic 7.0)
