# June Kim

junekinns@gmail.com

## EDUCATION

**University of Illinois Urbana-Champaign**, MCS (Online), GPA 3.67/4.0 — 2025 – 2026

**Chung-Ang University**, B.E. in Digital Imaging Engineering, GPA 3.99/4.5, Cum Laude — 2017 – 2020

Full-tuition scholarship (3 semesters); undergraduate research scholarship — 2017 – 2018

**Chungbuk National University**, Civil Engineering, transferred to Chung-Ang — 2011 – 2017

## EXPERIENCE

**SNOW Corp.** — Aug. 2023 – Present

Machine Learning Engineer

- Built object removal end to end, from brush input to final blending, for a premium feature serving millions of requests per month. Redesigned the inpainting model's loss and sampling schedule, cutting unwanted changes outside the mask by 40% and reducing visible seams.
- Reproduced a lip-gloss retouching effect that overlays and shaders could not with a LoRA on a distilled FLUX.2 model from a handful of before/after pairs, trained at the sampler's four noise levels with perceptual and adversarial losses. Artists now train new effects with the same tool.
- Built image expansion (outpainting) on the same model stack as a code-based production pipeline, and replaced a seam-quality metric that rewarded blurred boundaries.
- Fine-tuned background-removal adapters on production failures and added a lightweight router that sends graphic images to their own adapter; the feature's save and subscription rates doubled after launch.
- Trained the in-house NSFW classifier that screens generated images, including its dataset and evaluation pipeline. Serve all models on in-house GPUs under a fixed budget.

**NAVER Z Corp.** — Apr. 2022 – Aug. 2023

Unity Client Engineer

- Built world-editor features, including the UI system, terrain tools, and asset management, for a 3D social avatar platform, and optimized terrain rendering with custom shaders.

**SNOW Corp.** — Dec. 2019 – Apr. 2022

AR Software Engineer

- Developed real-time AR camera effects with face tracking in Lua and GLSL within mobile frame-rate limits, and built plugins for the in-house effect-authoring tools.

**Chung-Ang University**, Teaching Mentor, Computational Thinking and Problem Solving — Mar. – Jun. 2019

## RESEARCH AND PROJECTS

**AAAI-27 Student Abstract**, single author, submitted (non-archival) — Sep. 2026

*The Open Image-Editing Consistency Judge Is Mostly a Distance in Disguise*

**Volumetric Video Challenge**, SIGGRAPH Asia 2026 Workshop, 4D Gaussian splatting — Jul. – Sep. 2026

**NTIRE 2026 Shadow Removal Challenge**, CVPR 2026 Workshop — Jan. – Mar. 2026

**POSTECH Institute of Artificial Intelligence**, Research Intern, visual SLAM — Oct. – Nov. 2019

**Intel AI Drone Competition**, Team Lead, Honorable Mention — Aug. 2019

**Chung-Ang University Graphics Lab**, Undergraduate Research Assistant — Oct. 2018 – Jan. 2019

- Advisor: Prof. Kyoungju Park. Built VR and avatar components for a National Research Foundation project.

## SKILLS

- **ML:** PyTorch, Diffusers, diffusion models, LoRA fine-tuning, ComfyUI, image segmentation
- **Engineering:** Python, C++, OpenCV, LitServe, BentoML, Triton, FastAPI, Docker, Kubernetes, Linux
- **Graphics:** C#, Unity, Lua, GLSL **Languages:** Korean (native), English (IELTS Academic 7.0)
